Benefits for you!

# Further than from A to B

Logistics is much more than just transporting goods by truck. And air conditioning is more than just the supply of air. It's about designing buildings without draughts and creating a pleasant working atmosphere in offices. Kampmann systems provide this.

# Your strong partner

That's a promise! We're by your side, from design to after-sales service. Take advantage of individual solutions and our decades of experience.

# Your one-stop service

Don't waste time coordinating different air-conditioning trades.  
We are your qualified partner for all cross-trade systems.

# Winners in the energy-saving stakes!

Your customers will be investing with foresight in energy-saving technology with our solutions for logistics buildings.

# Networked buildings

Universal building automation combines centralised and decentralised solutions in a leading overall system. And of course, you can intervene decentrally at any time.

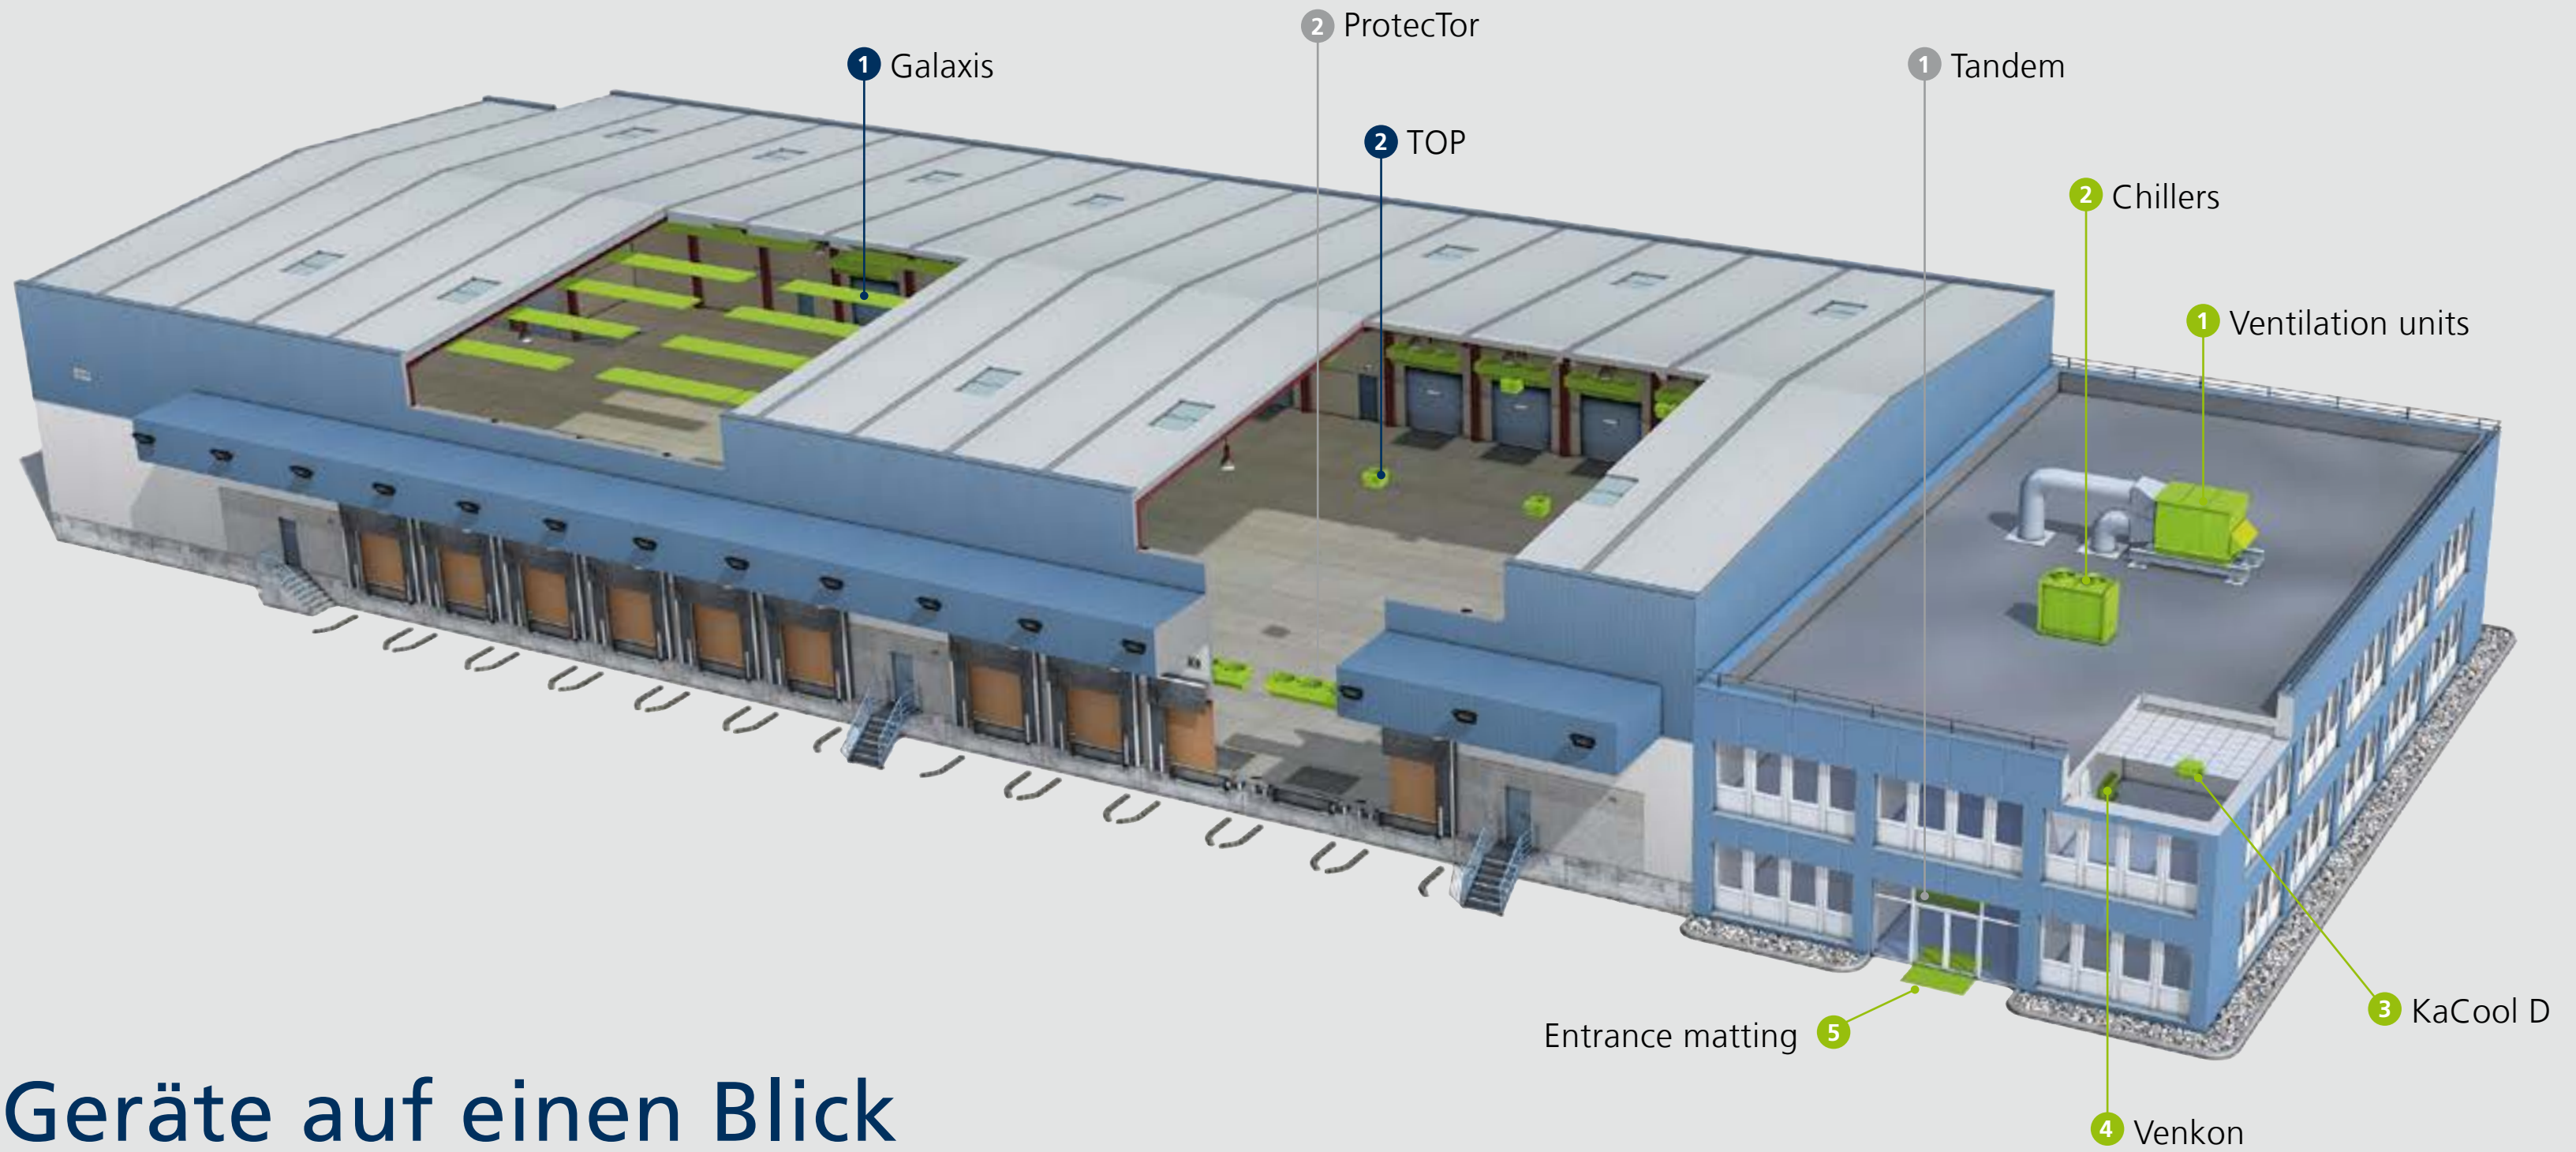

# Your building enhancer

Sustainability is good. Certification is better. As a GreenBuilding endorser, we are very concerned about enhancing the market value of your property. Get in touch with us to discuss your individual, energy-optimised building concept!

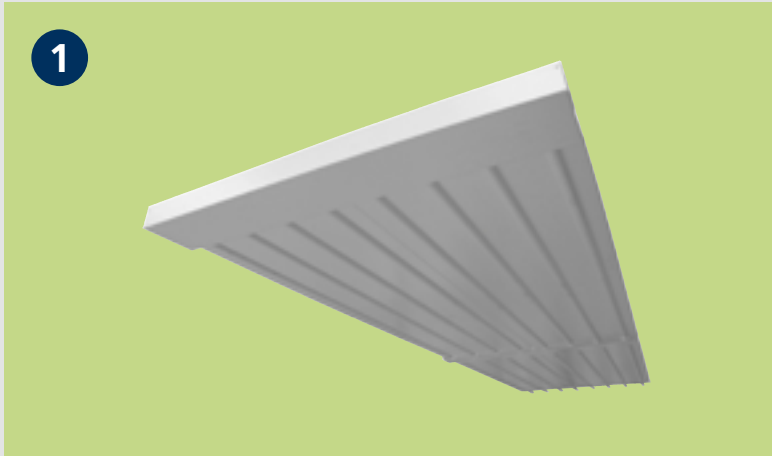

## Geräte auf einen Blick

### Galaxis radiant ceiling panel

- ▶ For thermal comfort and excellent energy-savings
- ▶ No draughts, no whirling dust
- ▶ Maintenance-free and easy to install
- ▶ Free choice of heat generator (heat pump, CHP, district heating etc.)

Register-No.  
011-8D003

### TOP unit heater

- ▶ Proven standard
- ▶ For universal installation on the wall or ceiling
- ▶ Neutral in colour, hard-wearing and tough
- ▶ Sendzimir-galvanised sheet steel housing
- ▶ Extremely economical in terms of power consumption

### Tandem door air curtain

- ▶ For controlled screening with open doors
- ▶ Visible or integrated in the ceiling
- ▶ Extensive accessories
- ▶ Tandem technology for energy savings of up to 38 percent

### Protector door air curtain

- ▶ Protection against the ingress of cold air through open doorways
- ▶ Unique, patented effect
- ▶ Energy savings up to 38 percent
- ▶ Connections only on one side

#### The Functions

Heating

Cooling

Ventilation

#### Uses

● Administrative buildings

● Halls, warehouses

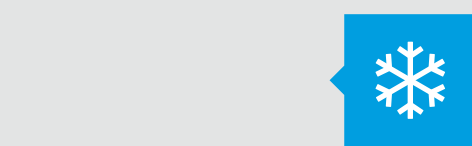

● Doors and doorways

### Ventilation units

- ▶ Small and large volumes of fresh air
- ▶ Max. energy efficiency by:
  - ▶ Efficient heat recovery
  - ▶ Environmentally-friendly evaporation cooling
- ▶ Standard or customised configuration
- ▶ Indoor or outdoor use (weather-proof)

### Chillers

- ▶ Wide range of sizes, performance levels and designs for optimum adaptations to your building
- ▶ Large range of accessories such as:
  - ▶ Heat recovery
  - ▶ Free cooling function

### KaCool D ceiling cassette

- ▶ Stylish RAL 9003 front panel to match ceiling grid dimensions
- ▶ 6 sizes for optimum adjustment of output
- ▶ Optional fresh air connection

### Venkon fan convectors

- ▶ Market-leading quiet
- ▶ High-quality manufacturing
- ▶ Hygiene-certified to VDI 6022
- ▶ Innovative accessories
- ▶ Heating and cooling with minimal energy

The quantities of refrigerant needed are reduced to a minimum by the use of water as a cooling medium, thereby extending statutory inspections and service intervals. This also preserves the environment.

#### The Functions

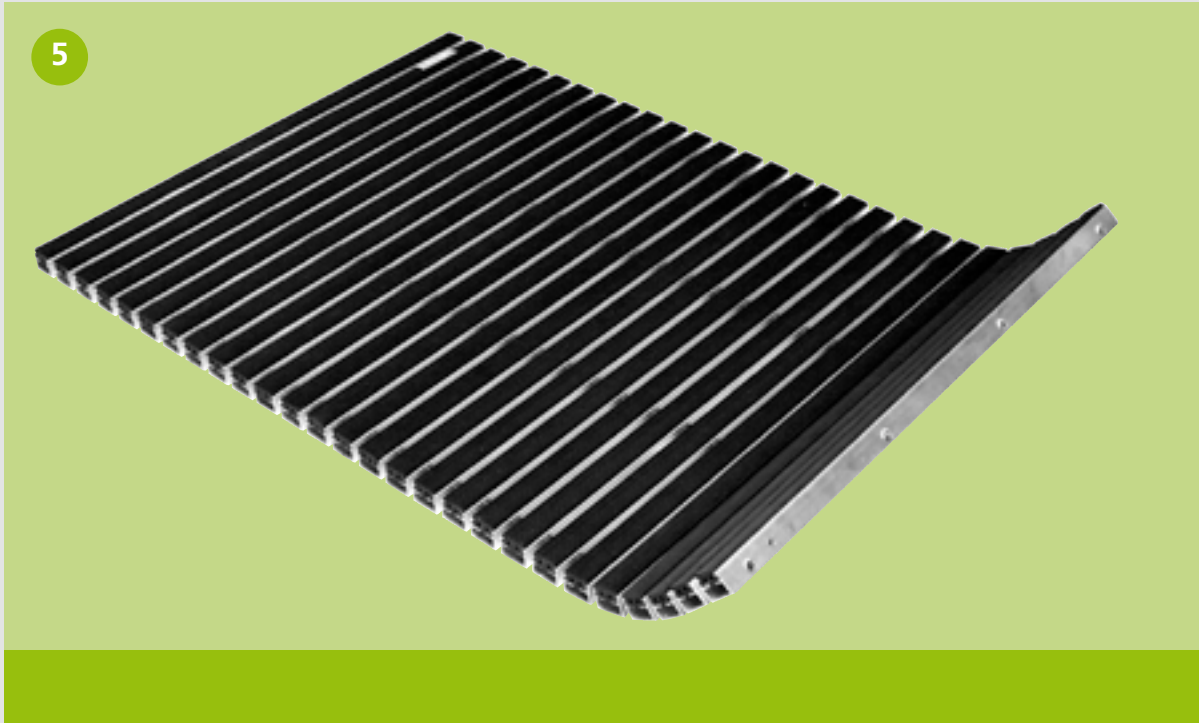

#### Uses

- Administrative buildings
- Halls, warehouses
- Doors and doorways

# Simply clean

## Entrance matting

Inside or outside: Our high-quality entrance matting makes entrance areas appear prestigious, spacious and welcoming.

# Efficient through and through

## EC technology

New EC technology is a revolution in electronic drive technology. It considerably enhances DC motor technology even at low output ranges, thereby ensuring energy savings.

### The Functions

### Uses

-  Administrative buildings
-  Halls, warehouses
-  Doors and doorways

# Everything under control with KaControl

## KaControl universal building automation system

- ▶ Brings centralised and decentralised unit solutions together in one overall functioning system
- ▶ KaController with intuitive user navigation
- ▶ CO<sub>2</sub>-based ventilation control
- ▶ With interfaces to the leading BMS standards for optimum interaction of units

### The Functions

Heating Cooling Ventilation

### Uses

- Administrative buildings
- Halls, warehouses
- Doors and doorways

# Benefits for you!
